Geobioevoluzione (Bios) (Italian Edition) Samuele Venturini

Tutti gli esseri viventi e gli ambienti presenti sul pianeta Terra sono intimamente connessi l'un l'altro e interagiscono tra loro per mezzo dei cicli biogeochimici. Ogni singola azione che coinvolge almeno un fattore biotico (esseri viventi) o abiotico (condizioni ambientali) si ripercuote a livello biogeochimico innescando conseguenze su più livelli tra cui quello chimico (cicli degli elementi), quello biologico (dinamiche di popolazione) e quello geologico (fattori climatici). Tutti questi livelli sono interconnessi l'uno con l'altro in quello stato di equilibrio dinamico denominato "geobioevoluzione". Quest'opera vuole incuriosire il lettore nello studio e nell'osservazione di queste interazioni che avvengono sia nello spazio sia nel tempo per comprendere meglio il valore inestimabile ma estremamente fragile che rende il nostro pianeta vivo.
