The Limits of Transnationalism: Collective Identities and EU Integration Markus Thiel

Through the application of public opinion, interview, and print-media analyses, this book provides evidence that the state of transnational identification among citizens in the EU as a result of post-Maastricht integration measures, such as the completion of the Common Market, the introduction of the Euro, the initiation of the Common Foreign and Security Policy etc. in the United Kingdom, Ireland, and Germany had limited effects in the member states to the extent that national political cultures and mass media orientations are compatible with the goals of EU integration. Policy recommendations are derived by reviewing the complex relationship between EU policies and structural factors such as immigration, ageing and the mediatization of politics in which European integration occurs.
