Aviation - Theorico-Practical text-book for students (History of Aviation) Benjamin M. Carmina
ORIGINAL DESCRIPTION (1919) - In the compilation of this book, the guiding principle has been to use matter of actual theorico-practical value to the aviation students to enable them to work knowingly. Admittedly, the aeroplane is in its infancy, but an infant that can go at such a high rate of speed and perform such marvelous feats certainly deserves more than passing attention, and it is high time to standardize the names of its parts, at least.
