Disaster Risk Reduction Approaches in Bangladesh

Disaster Risk Reduction Approaches in Bangladesh

This book outlines disaster risk reduction (DRR) approaches in Bangladesh, drawing examples and lessons from the national and community-level programs, projects, and relevant experiences of the country. The content is based on a selection of available documents, a consultative workshop with academicians from different universities undertaking DRR higher education programs, and the editors' own knowledge and experience in the field. Special emphasis is given to analyzing field experiences from academic perspectives, and to highlighting key issues and the policy relevance of disaster risk reduction.

The book has three parts: Part I provides the outline and basics of DRR, with examples from a global review and from national policies and priorities. Part II covers seven different hazards in Bangladesh, focusing on both shocks and stresses. Part III provides examples of approaches and issues of DRR practices.

The primary target groups for this book are students and researchers in the fields of environment, disaster risk reduction, and climate change studies. The book will provide them with a good idea of the current trend of research in the field and will furnish basic knowledge on this important topic in Bangladesh. Another target group comprises practitioners and policy makers, who will be able to apply collective knowledge to policy and decision making.
