Human Population Genetic Research in Developing Countries: The Issue of Group Protection (Biomedical Law and Ethics Library) Yue Wang

Human population genetic research (HPGR) seeks to identify the diversity and variation of the human genome and how human group and individual genetic diversity has developed. This book asks whether developing countries are well prepared for the ethical and legal conduct of human population genetic research, with specific regard to vulnerable target group protection. The book highlights particular issues raised by genetic research on populations as a whole, such as the potential harm specific groups may suffer in genetic research, and the capacity for current frameworks of Western developed countries to provide adequate protections for these target populations.

Using The People's Republic of China as a key example, Yue Wang argues that since the target groups of HPGR are almost always from isolated and rural areas of developing countries, the ethical and legal frameworks for human subject protection need to be reconsidered in order to eliminate, or at least reduce, the vulnerability of those groups. While most discussion in this field focuses on the impact of genetic research on individuals, this book breaks new ground in exploring how the interests of target groups are also seriously implicated in genetic work. In evaluating current regulations concerning prevention of harm to vulnerable groups, the book also puts forward an alternative model for group protection in the context of human population genetic research in developing countries. The book will be of great interest to students and academics of medical law, ethics, and the implications of genetic research.

From reader reviews:

Nora Carter:

Reading a book can be one of a lot of pastime that everyone in the world really likes. Do you like reading book and so. There are a lot of reasons why people like it. First reading a guide will give you a lot of new data. When you read a book you will get new information mainly because book is one of many ways to share the information or their idea. Second, examining a book will make an individual more imaginative. When you reading through a book especially hype book the author will bring someone to imagine the story how the character types do it anything. Third, it is possible to share your knowledge to other individuals. When you read this Human Population Genetic Research in Developing Countries: The Issue of Group Protection (Biomedical Law and Ethics Library), it is possible to tells your family, friends and soon about yours publication. Your knowledge can inspire average, make them reading a book.

Carol Berry:

Your reading 6th sense will not betray anyone, why because this Human Population Genetic Research in Developing Countries: The Issue of Group Protection (Biomedical Law and Ethics Library) reserve written by well-known writer who really knows well how to make book which can be understand by anyone who read the book. Written within good manner for you, dripping every ideas and producing skill only for eliminate your personal hunger then you still hesitation Human Population Genetic Research in Developing Countries: The Issue of Group Protection (Biomedical Law and Ethics Library) as good book not only by the cover but also by the content. This is one reserve that can break don't ascertain book by its handle, so do you still needing one more sixth sense to pick this particular!? Oh come on your studying sixth sense already alerted you so why you have to listening to yet another sixth sense.

Dan Morris:

As we know that book is vital thing to add our knowledge for everything. By a publication we can know everything we wish. A book is a list of written, printed, illustrated or blank sheet. Every year ended up being exactly added. This book Human Population Genetic Research in Developing Countries: The Issue of Group Protection (Biomedical Law and Ethics Library) was filled regarding science. Spend your extra time to add your knowledge about your technology competence. Some people has distinct feel when they reading any book. If you know how big benefit of a book, you can experience enjoy to read a publication. In the modern era like today, many ways to get book which you wanted.

Concepcion Bass:

A lot of reserve has printed but it differs. You can get it by online on social media. You can choose the most effective book for you, science, amusing, novel, or whatever by searching from it. It is named of book Human Population Genetic Research in Developing Countries: The Issue of Group Protection (Biomedical Law and Ethics Library). You can contribute your knowledge by it. Without leaving behind the printed book,

it could add your knowledge and make a person happier to read. It is most essential that, you must aware about publication. It can bring you from one destination to other place.
