Memories of God and Creation: Remembering from the Subconscious Mind Shakuntala Modi

Is it possible to remember how the universe was created, where humans came from, and what we planned to do with our lives? Yes, says board-certified psychiatrist Shakuntala Modi, M.D. For more than a decade Dr. Modi has used clinical hypnosis to help patients deiscover the sources of their physical and mental health problems, not only in their pasts, but even in their past lives. Now she targets the cosmos.

According to Dr. Modi, everyone carries memories of God and creation in their subconscious. This book presents information from many of her hypnotized patients, presenting evidence that we all carry the secrets of the universe within us.

The astonishing revelations in this book include real patient descriptions of:

- What it's like to be one with God
- Why there are individual souls
- Where evil came from
- How angels were created
- How dying feels
- How easy it is to return to Heaven after death

Prepare to have your world view completely altered by the information in *Memories of God and Creation*.
