## **Emerging Dairy Processing Technologies: Opportunities for the Dairy Industry (IFST Advances in Food Science)** Nivedita Datta, Peggy M. Tomasula

Fluid milk processing is energy intensive, with high financial and energy costs found all along the production line and supply chain. Worldwide, the dairy industry has set a goal of reducing GHG emissions and other environmental impacts associated with milk processing. Although the major GHG emissions associated with milk production occur on the farm, most energy usage associated with milk processing occurs at the milk processing plant and afterwards, during refrigerated storage (a key requirement for the transportation, retail and consumption of most milk products). Sustainable alternatives and designs for the dairy processing plants of the future are now being actively sought by the global dairy industry, as it seeks to improve efficiency, reduce costs, and comply with its corporate social responsibilities. *Emerging Dairy Processing Technologies: Opportunities for the Dairy Industry* presents the state of the art research and technologies that have been proposed as sustainable replacements for high temperature-short time (HTST) and ultra-high temperature (UHT) pasteurization, with potentially lower energy usage and greenhouse gas emissions. These technologies include pulsed electric fields, high hydrostatic pressure, high pressure homogenization, ohmic and microwave heating, microfiltration, pulsed light, UV light processing, and carbon dioxide processing. The use of bacteriocins, which have the potential to improve the efficiency of the processing technologies, is discussed, and information on organic and pasture milk, which consumers perceive as sustainable alternatives to conventional milk, is also provided. This book brings together all the available information on alternative milk processing techniques and their impact on the physical and functional properties of milk, written by researchers who have developed a body of work in each of the technologies. This book is aimed at dairy scientists and technologists who may be working in dairy companies or academia. It will also be highly relevant to food processing experts working with dairy ingredients, as well as university departments, research centres and graduate students.

### **From reader reviews:**

#### **Marjorie Batchelder:**

Book is usually written, printed, or descriptive for everything. You can realize everything you want by a publication. Book has a different type. To be sure that book is important point to bring us around the world. Close to that you can your reading talent was fluently. A guide Emerging Dairy Processing Technologies: Opportunities for the Dairy Industry (IFST Advances in Food Science) will make you to end up being smarter. You can feel considerably more confidence if you can know about everything. But some of you think which open or reading a new book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you looking for best book or suitable book with you?

#### **Alan Johnson:**

Information is provisions for individuals to get better life, information these days can get by anyone on everywhere. The information can be a expertise or any news even a concern. What people must be consider whenever those information which is inside former life are hard to be find than now could be taking seriously which one works to believe or which one the resource are convinced. If you get the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take Emerging Dairy Processing Technologies: Opportunities for the Dairy Industry (IFST Advances in Food Science) as your daily resource information.

#### **Troy Harlow:**

Playing with family in a very park, coming to see the coastal world or hanging out with pals is thing that usually you will have done when you have spare time, subsequently why you don't try point that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Emerging Dairy Processing Technologies: Opportunities for the Dairy Industry (IFST Advances in Food Science), you can enjoy both. It is excellent combination right, you still wish to miss it? What kind of hang-out type is it? Oh can happen its mind hangout men. What? Still don't get it, oh come on its referred to as reading friends.

#### **Steven Delorme:**

Are you kind of hectic person, only have 10 or even 15 minute in your time to upgrading your mind skill or thinking skill possibly analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your small amount of time to read it because this all time you only find guide that need more time to be go through. Emerging Dairy Processing Technologies: Opportunities for the Dairy Industry (IFST Advances in Food Science) can be your answer as it can be read by you who have those short free time problems.
