## Taxation and Gender Equity: A Comparative Analysis of Direct and Indirect Taxes in Developing and Developed Countries (Routledge International Studies in Money and Banking)

Around the world, there are concerns that many tax codes are biased against women, and that contemporary tax reforms tend to increase the incidence of taxation on the poorest women while failing to generate enough revenue to fund the programs needed to improve these women's lives. Because taxes are the key source of revenue governments themselves raise, understanding the nature and composition of taxation and current tax reform efforts is key to reducing poverty, providing sufficient revenue for public expenditure, and achieving social justice.

This is the first book to systematically examine gender and taxation within and across countries at different levels of development. It presents original research on the gender dimensions of personal income taxes, and value-added, excise, and fuel taxes in Argentina, Ghana, India, Mexico, Morocco, South Africa, Uganda and the United Kingdom. This book will be of interest to postgraduates and researchers studying Public Finance, International Economics, Development Studies, Gender Studies, and International Relations, among other disciplines.
