## Integrated Air Quality Management: Asian Case Studies

The steady growth in the number of vehicles on the road, heavy reliance on coal, use of dirty fuels for residential combustion, and extensive open burning are some of the major factors leading to the progressive deterioration of air quality in developing countries in Asia. And despite efforts to establish and implement air quality measurement systems, the development of infrastructure, environmental technology, and management practices continues to lag behind the rate of emission increase. Based on ten years of coordinated research, **Integrated Air Quality Management: Asian Case Studies** discusses technical and policy tools for the integrated air quality management of developing countries in Asia.

The book begins with an overview of major issues of air quality management practices in developing Asia and potential approaches to reduce pollution, including opportunities for integration of air quality improvement and climate migration strategies. It covers the methodology and results of fine particulate matter monitoring using traditional filter-based and satellite monitoring techniques. It examines the applications of a 3D dispersion modeling tool for urban and regional air quality management focusing on surface ozone, fine particulate matter, and acid deposition. The final chapters discuss innovative control technologies for gaseous air pollutants and illustrate the integrated air quality management in developing Asia through case studies for target source categories including agricultural residue field burning, vehicle emissions, brick kilns, and industrial VOC emission.

Illustrated with case studies, this book presents an integrated air quality management methodology that employs technical and policy tools to achieve air quality goals. It includes technical information and policy recommendations based on the outcomes of several multi-year air quality research programs coordinated by the Asian Institute of Technology. The text combines fundamental information and advanced knowledge useful to large audiences dealing with subjects of integrated air quality management.

### From reader reviews:

#### **Sarah Maddocks:**

In this 21st one hundred year, people become competitive in every single way. By being competitive currently, people have do something to make all of them survives, being in the middle of the crowded place and notice by means of surrounding. One thing that at times many people have underestimated that for a while is reading. Yep, by reading a book your ability to survive increase then having chance to stand than other is high. For you personally who want to start reading some sort of book, we give you this Integrated Air Quality Management: Asian Case Studies book as nice and daily reading e-book. Why, because this book is more than just a book.

#### **William Mayer:**

This Integrated Air Quality Management: Asian Case Studies are generally reliable for you who want to become a successful person, why. The explanation of this Integrated Air Quality Management: Asian Case Studies can be among the great books you must have will be giving you more than just simple reading through food but feed you actually with information that might be will shock your preceding knowledge. This book is definitely handy, you can bring it almost everywhere and whenever your conditions in e-book and printed types. Beside that this Integrated Air Quality Management: Asian Case Studies giving you an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that could it useful in your day activity. So , let's have it appreciate reading.

#### **Mark Bunnell:**

Are you kind of occupied person, only have 10 as well as 15 minute in your time to upgrading your mind talent or thinking skill possibly analytical thinking? Then you are having problem with the book compared to can satisfy your limited time to read it because this time you only find reserve that need more time to be read. Integrated Air Quality Management: Asian Case Studies can be your answer since it can be read by you who have those short time problems.

#### **Craig Nazario:**

With this era which is the greater individual or who has ability to do something more are more treasured than other. Do you want to become one of it? It is just simple way to have that. What you have to do is just spending your time little but quite enough to have a look at some books. Among the books in the top collection in your reading list will be Integrated Air Quality Management: Asian Case Studies. This book that is qualified as The Hungry Hillside can get you closer in turning out to be precious person. By looking up and review this e-book you can get many advantages.
