Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students

Jenny Olive

This friendly self-help workbook covers mathematics essential to first-year undergraduate scientists and engineers. In the second edition of this highly successful textbook the author has completely revised the existing text and added a totally new chapter on vectors. Mathematics underpins all science and engineering degrees, and this may cause problems for students whose understanding of the subject is weak. In this book Jenny Olive uses her extensive experience of teaching and helping students by giving a clear and confident presentation of the core mathematics needed by students starting science or engineering courses. The book contains almost 800 exercises, with detailed solutions given in the back to allow students who get stuck to see exactly where they have gone wrong. Topics covered include trigonometry and hyperbolic functions, sequences and series (with detailed coverage of binomial series), differentiation and integration, complex numbers, and vectors.

From reader reviews:

Robert Marques:

Do you have favorite book? For those who have, what is your favorite's book? Guide is very important thing for us to be aware of everything in the world. Each guide has different aim as well as goal; it means that reserve has different type. Some people experience enjoy to spend their a chance to read a book. These are reading whatever they take because their hobby is reading a book. Consider the person who don't like examining a book? Sometime, particular person feel need book when they found difficult problem or exercise. Well, probably you will need this Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students.

Marlene Wiedman:

Book is to be different for each and every grade. Book for children right up until adult are different content. As we know that book is very important normally. The book Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students had been making you to know about other information and of course you can take more information. It is extremely advantages for you. The publication Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students is not only giving you much more new information but also to be your friend when you really feel bored. You can spend your current spend time to read your book. Try to make relationship while using book Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students. You never sense lose out for everything in case you read some books.

Karin Eubanks:

The experience that you get from Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students could be the more deep you looking the information that hide into the words the more you get thinking about reading it. It doesn't mean that this book is hard to comprehend but Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students giving you excitement feeling of reading. The author conveys their point in selected way that can be understood simply by anyone who read the idea because the author of this publication is well-known enough. This book also makes your own personal vocabulary increase well. Making it easy to understand then can go together with you, both in printed or e-book style are available. We propose you for having this Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students instantly.

Nancy Steffen:

As a university student exactly feel bored to reading. If their teacher asked them to go to the library as well as to make summary for some book, they are complained. Just minor students that has reading's heart and soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that studying is not important, boring and also

can't see colorful photos on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students can make you really feel more interested to read.
