Implementing Successful Building Information Modeling Erica Epstein
Building Information Modeling (BIM) is the process of generating and managing building data during a
building's lifecycle. Today, more and more architectural firms have adopted BIM software and processes
because it allows them to produce measurably more work of better quality, in shorter periods of time.
Featuring case studies of firms of all sizes, this practical resource shows you how to implement BIM in the
building industry around the globe. The book explains how BIM allows collected data to be used and added
to during the occupied life of the building. You also become knowledgeable about the changing role of
architects within the building industry as they embed BIM in their workflow. From interoperability and open
standards, knowledge sharing, and gathering data, to the BIM software suite, implementation planning, and
project workflow, this authoritative volume provides a thorough understanding of key aspects of BIM.
