Reproductive Biotechnology in Finfish Aquaculture

Reproductive Biotechnology in Finfish Aquaculture

The successful reproduction of cultured brood stock is essential to the sustainable aquaculture of aquatic organisms. This book describes recent advances in the field of finfish reproductive biotechnology. The chapters in this volume are written by eminent scientists who review the progress and assess the status of biotechnology research that is applicable to the reproduction of finfish species for aquaculture. A wide range of topics is included starting with broodstock technologies such as broodstock genetics, broodstock nutrition, environmental control of maturation and impacts of stress on broodstock, gametes and progeny.

The volume includes technologies for induction of ovulation and spermiation using synthetic hypothalamic peptides. Gamete technologies which are described include cryopreservation, chromosome set manipulation, disease prevention and control for gametes and embryos and the development of transgenic fish with enhanced production characteristics. Genetic and endocrine technologies for the production of monosex male and female fish stocks are also described.

The closing chapter summarizes the discussion of each topic at the workshop, provides recommendations to industry and describes priorities of research and development. Researchers as well as teaching faculty in the aquaculture field will find this volume of great value.

From reader reviews:

Ivory Hughes:

Why don't make it to be your habit? Right now, try to ready your time to do the important behave, like looking for your favorite reserve and reading a e-book. Beside you can solve your condition; you can add your knowledge by the book entitled Reproductive Biotechnology in Finfish Aquaculture. Try to face the book Reproductive Biotechnology in Finfish Aquaculture as your buddy. It means that it can to get your friend when you sense alone and beside associated with course make you smarter than ever before. Yeah, it is very fortuned in your case. The book makes you considerably more confidence because you can know every little thing by the book. So, let us make new experience in addition to knowledge with this book.

Leslie Bergeron:

In this 21st centuries, people become competitive in every way. By being competitive at this point, people have do something to make these people survives, being in the middle of the crowded place and notice through surrounding. One thing that often many people have underestimated the item for a while is reading. Sure, by reading a publication your ability to survive raise then having chance to remain than other is high. For yourself who want to start reading a new book, we give you that Reproductive Biotechnology in Finfish Aquaculture book as beginning and daily reading reserve. Why, because this book is greater than just a book.

Robert Schneck:

The book untitled Reproductive Biotechnology in Finfish Aquaculture contain a lot of information on the item. The writer explains your girlfriend idea with easy technique. The language is very clear to see all the people, so do not really worry, you can easy to read the idea. The book was published by famous author. The author gives you in the new age of literary works. You can easily read this book because you can continue reading your smart phone, or product, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site and order it. Have a nice examine.

Gilbert Westmoreland:

Don't be worry should you be afraid that this book will certainly filled the space in your house, you will get it in e-book method, more simple and reachable. That Reproductive Biotechnology in Finfish Aquaculture can give you a lot of close friends because by you considering this one book you have factor that they don't and make you more like an interesting person. That book can be one of one step for you to get success. This publication offer you information that might be your friend doesn't recognize, by knowing more than some other make you to be great folks. So , why hesitate? Let us have Reproductive Biotechnology in Finfish Aquaculture.
