Information Flow and Knowledge Sharing (Capturing Intelligence) Flavio Soares Correa da Silva, Jaume Agusti-Cullell

Excerpt from the Foreword

The stated aim of the book series "Capturing Intelligence" is to publish books on research from all disciplines dealing with and affecting the issue of understanding and reproducing intelligence artificial systems. Of course, much of the work done in the past decades in this area has been of a highly technical nature, varying from hardware design for robots, software design for intelligent agents, and formal logic for reasoning.

It is therefore very refreshing to see Information Flow and Knowledge Sharing. This is a courageous book indeed. It is not afraid to tackle the Big Issues: notions such as information, knowledge, information system, information flow, collaborative problem solving, and ontological reasoning. All of these notions are crucial to our understanding of intelligence and our building of intelligent artificial systems, but all too often, these Big Issues are hidden behind the curtains while the technical topics take center stage.

AI has a rich history of philosophical books that have chosen a non-standard structure and narrative. It is nice to see that the authors have succeeded into combining a non-standard approach to deep questions with a non-standard format, resulting in a highly interesting volume.

Frank van Harmelen, Series Editor

Excerpt from the Introduction

Our interest is to promote, through a better and deeper understanding of the notions of information and knowledge, a better and deeper critical understanding of information technology as situated in the full range of human activities, assuming as a principle that this range of activities cannot be properly appreciated when it is reduced to the simplified means-end schema proposed by Technology. We invite the reader to build his/her own points of view about these notions, considering our propositions as a starting point for a critical analysis and discussion of these points. With that, we believe we are contributing to a better understanding of the impact of technology - and particularly of Information Technology - in everyday life.

Flavio Soares Correa da Silva, Jaume Agusti-Cullell

*Bridges the gap between the technological and philosophical aspects of information technology

*Analyzes essential notions of IT such as information, knowledge, information system, information flow, collaborative problem solving, and ontological reasoning

From reader reviews:

Steven Tran:

What do you concerning book? It is not important with you? Or just adding material when you really need something to explain what yours problem? How about your extra time? Or are you busy particular person? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Everyone has many questions above. They must answer that question since just their can do that will. It said that about book. Book is familiar in each person. Yes, it is proper. Because start from on jardín de infancia until university need this Information Flow and Knowledge Sharing (Capturing Intelligence) to read.

Juan Elam:

This Information Flow and Knowledge Sharing (Capturing Intelligence) book is just not ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is information inside this reserve incredible fresh, you will get details which is getting deeper an individual read a lot of information you will get. This particular Information Flow and Knowledge Sharing (Capturing Intelligence) without we comprehend teach the one who examining it become critical in contemplating and analyzing. Don't be worry Information Flow and Knowledge Sharing (Capturing Intelligence) can bring whenever you are and not make your carrier space or bookshelves' turn out to be full because you can have it in the lovely laptop even phone. This Information Flow and Knowledge Sharing (Capturing Intelligence) having very good arrangement in word and also layout, so you will not experience uninterested in reading.

Dennis Bloom:

Do you one among people who can't read enjoyable if the sentence chained inside the straightway, hold on guys this kind of aren't like that. This Information Flow and Knowledge Sharing (Capturing Intelligence) book is readable by means of you who hate those straight word style. You will find the details here are arrange for enjoyable examining experience without leaving even decrease the knowledge that want to deliver to you. The writer involving Information Flow and Knowledge Sharing (Capturing Intelligence) content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the information but it just different such as it. So , do you even now thinking Information Flow and Knowledge Sharing (Capturing Intelligence) is not loveable to be your top listing reading book?

Robert Auclair:

Is it an individual who having spare time then spend it whole day simply by watching television programs or just laying on the bed? Do you need something new? This Information Flow and Knowledge Sharing (Capturing Intelligence) can be the response, oh how comes? The new book you know. You are and so out of date, spending your free time by reading in this brand new era is common not a nerd activity. So what these publications have than the others?
