Capitalism (Routledge Frontiers of Political Economy) Victor D. Lippit

This imaginative and ambitious book rethinks the nature of capitalism. Lippit, a leading heterodox economist in the USA, here delivers a comparative study of different forms of capitalism. He first critically examines the three main capitalist prototypes:

- * the Anglo-American, market-driven version
- * the welfare-state capitalism of continental Europe
- * the state-led capitalism of East Asia.

After investigating their various intricacies, he then goes on to analyze the common weaknesses of each different strand. A provocative and stimulating read, this book will be welcomed by postgraduates and professionals in the fields of economics and political economy.
